

PROFESSIONAL SUMMARY

NetApp Storage And Infrastructure Engineer with **6 years** of experience managing enterprise storage, VMware virtualization, Windows/Linux systems, and backup solutions. Skilled in **NetApp ONTAP, SAN/NAS administration, SnapMirror, SnapVault, Snapshot, LUN provisioning, NFS, SMB/CIFS, Fibre Channel, and iSCSI**. Experienced in storage migrations, disaster recovery, infrastructure monitoring, performance tuning, and production support. Passionate about delivering reliable, scalable, and high-performance enterprise infrastructure solutions.

WORK EXPERIENCE

Tata Consultancy Services

Jan 2022

NetApp Storage And Infrastructure Engineer

- Administered and optimized **NetApp ONTAP** storage environments, ensuring high availability, performance, and reliability for mission-critical enterprise applications.
- Configured and managed **Storage Virtual Machines (SVMs), aggregates, FlexVol volumes, LUNs, NFS exports, and SMB/CIFS shares** across enterprise SAN and NAS infrastructures.
- Implemented **Snapshot, SnapMirror, and SnapVault** solutions for backup, replication, disaster recovery, and business continuity while meeting defined RTO/RPO objectives.
- Performed **ONTAP upgrades**, firmware updates, storage migrations, capacity planning, and lifecycle management to maintain secure, scalable, and highly available storage environments with minimal downtime.
- Integrated **NetApp ONTAP** with **VMware vSphere** by provisioning **VMFS** and **NFS datastores**, while supporting enterprise storage connectivity using **Fibre Channel, iSCSI, NFS, and SMB/CIFS**.
- Administered **Linux** and **Windows Server** storage integrations, including **NFS mount configuration, Active Directory, DNS, DHCP**, and storage access validation while troubleshooting storage and infrastructure issues.
- Monitored storage health, replication, and infrastructure performance, providing **Tier 2/3 production support** through **ServiceNow** by resolving critical storage, VMware, backup, and SAN incidents using root cause analysis.
- Collaborated with infrastructure, networking, virtualization, and application teams to implement secure enterprise storage solutions while developing technical documentation, disaster recovery procedures, operational runbooks, and change management records.
- Implemented storage security and data protection best practices by managing **Snapshot policies**, access controls, storage permissions, and replication strategies to ensure data integrity and regulatory compliance.
- Performed proactive storage health assessments, capacity forecasting, and performance analysis using enterprise monitoring tools, reducing operational risks and improving overall storage availability and resource utilization.

CEVA Software Solutions

Sept 2019 – Jan 2022

Associate II – Enterprise Storage Engineer

- Supported enterprise **NetApp ONTAP** storage environments by provisioning and managing **volumes, LUNs, NFS exports, and SMB/CIFS shares** across SAN and NAS infrastructures.
- Assisted in configuring and maintaining **Snapshot, SnapMirror, and SnapVault** technologies to support backup, disaster recovery, and business continuity requirements.
- Administered **Linux** and **Windows Server** environments by supporting **NFS mounts, storage connectivity, Active Directory** integration, and filesystem troubleshooting.
- Performed storage provisioning, firmware upgrades, hardware maintenance, health checks, capacity monitoring, and preventive maintenance to ensure high availability and optimal system performance.
- Supported enterprise **SAN/NAS** environments using **Fibre Channel, iSCSI, NFS, and SMB/CIFS**, troubleshooting storage access and connectivity issues across production systems.
- Collaborated with infrastructure, virtualization, networking, and application teams to resolve production incidents, implement storage solutions, and maintain reliable enterprise infrastructure services.
- Prepared technical documentation, operational procedures, implementation guides, and change management records while supporting disaster recovery testing and infrastructure improvement initiatives.

TECHNICAL SKILLS

Enterprise Storage: NetApp ONTAP, Storage Virtual Machines (SVMs), FlexVol Volumes, Aggregates, LUN Provisioning, Snapshot, SnapMirror, SnapVault, SAN, NAS, NFS, SMB/CIFS, Fibre Channel (FC), iSCSI, RAID Configuration, Storage Virtualization, Backup & Disaster Recovery, Capacity Planning, Storage Lifecycle Management.

Infrastructure & Virtualization: VMware vSphere, ESXi, vCenter Server, VMFS, NFS Datastores, Virtual Machine Administration, Windows Server, Linux/Unix, Active Directory, DNS, DHCP, Hybrid Cloud Infrastructure, Enterprise Datacenter Operations.

Monitoring & Operations: ServiceNow, Incident Management, Root Cause Analysis (RCA), Performance Monitoring, Google Cloud Monitoring, Cloud Logging, Alerting, Health Checks, Disaster Recovery Testing, Change Management.

Automation & Scripting: Bash, Shell Scripting, Python, GitHub, Git, Infrastructure as Code (IaC), Automation Fundamentals.

Networking: TCP/IP, VLANs, Ethernet, Fibre Channel, iSCSI, SAN Fabric, Storage Connectivity Validation, Network Troubleshooting.

Databases: MySQL, Microsoft SQL Server (MSSQL), Oracle Database.

Methodologies: ITIL, Agile, Scrum, DevOps Practices, Site Reliability Engineering (SRE), Continuous Monitoring, Capacity Planning, Disaster Recovery, Change Management.

PERSONAL PROJECTS

StoragePilot AI | NetApp ONTAP, FastAPI, React, PostgreSQL, Docker 2026

- Designed and developed an **AI-assisted enterprise storage management platform** for monitoring and interacting with **NetApp ONTAP** environments.
- Built **FastAPI REST endpoints** for clusters, SVMs, volumes, and aggregates with an architecture designed for ONTAP REST API integration.
- Developed a **React dashboard** for storage capacity, health, and infrastructure visibility with **PostgreSQL** for data management.
- Containerized the application using **Docker** and implemented simulated ONTAP data services for storage workflows and AI-assisted operations.

Enterprise NetApp Disaster Recovery Lab | NetApp ONTAP Simulator, VMware vSphere, Linux 2025

- Designed and deployed a simulated enterprise **NetApp ONTAP** environment for storage administration, backup, replication, and disaster recovery.
- Configured **SVMs, aggregates, FlexVol volumes, LUNs, NFS, and iSCSI** storage for Windows, Linux, and VMware workloads.
- Implemented **Snapshot, SnapMirror, and SnapVault** policies for data protection, replication, disaster recovery, and RTO/RPO validation.
- Provisioned VMware datastores using **NFS and iSCSI**, performed failover/failback testing, and monitored storage health.

CERTIFICATIONS

- * NetApp Certified Technology Associate (NS0-002)
- * NetApp ONTAP Data Protection Administration
- * NetApp Hybrid Cloud Fundamentals
- * NetApp Flash Storage Fundamentals
- * VMware Certified Professional (VCP) - Data Center Virtualization
- * AWS Certified Cloud Practitioner
- * Microsoft Certified: Azure Fundamentals (AZ-900)

EDUCATION

University of South Dakota	Aug 2024 – May 2026
Master of Science in Computer Science GPA: 3.7/4	United States
Pydah College of Engineering And Technology	2016 – 2019
Bachelor of Technology in Civil Engineering GPA: 7.10/10	India
