WORK EXPERIENCE

Tata Consultancy Services

Jan 2022 – May 2026
India

NetApp Storage And Backup Administrator

- Administered and optimized NetApp storage systems to ensure high availability, performance, and reliability for mission-critical enterprise applications.
- Led implementation, configuration, upgrades, and troubleshooting of NetApp storage systems including ONTAP upgrades, SnapDrive, SnapMirror, and SnapVault technologies.
- Designed and implemented robust backup and replication strategies using SnapMirror and SnapVault ensuring data integrity, business continuity, and rapid recovery capabilities.
- Diagnosed and resolved complex storage infrastructure issues across SAN/NAS environments conducting root cause analysis and implementing corrective actions to minimize downtime and maintain high availability.
- Architected and implemented SAN/NAS storage configurations including LUN provisioning, NFS/SMB shares, and VMware datastore integration.
- Performed ONTAP upgrades, storage migrations, and replication configurations with zero unplanned downtime while implementing disaster recovery solutions aligned with defined RTO/RPO requirements.
- Provided Tier 2/3 support through ServiceNow resolving high-priority (P1/P2) incidents related to storage performance, replication failures, backup disruptions, and SAN connectivity issues while meeting SLA targets.
- Administered and supported Windows Server roles including Active Directory, DNS, and DHCP troubleshooting impacting enterprise systems and infrastructure operations.
- Managed Linux server storage integrations by configuring NFS mounts, managing filesystem permissions, and performing system-level troubleshooting to ensure seamless storage access.
- Provisioned and optimized storage solutions for MSSQL and Oracle database environments supporting high-performance enterprise workloads and backup operations.
- Translated organizational requirements into scalable hybrid cloud storage solutions integrating on-premises NetApp systems with AWS and Azure platforms for disaster recovery readiness and long-term scalability planning.
- Supported SAN fabric environments including FC connectivity troubleshooting, zoning coordination, and enterprise storage connectivity validation across SAN/NAS infrastructure.
- Performed storage capacity forecasting, utilization analysis, lifecycle management, and operational documentation to improve storage efficiency and maintain high-availability production environments.
- Familiar with object storage and S3-compatible storage concepts supporting hybrid enterprise storage environments with focus on disaster recovery, monitoring, and operational reliability.
- Participated in disaster recovery planning, failover validation, OS patching coordination, and storage infrastructure maintenance activities ensuring minimal downtime across enterprise environments.

CEVA SOFTWARE SOLUTIONS

2019 Sept - Jan 2022
Visakhapatnam

Junior Level Storage Engineer

- Administered and monitored enterprise storage infrastructure, ensuring high availability, reliability, and optimal performance of storage systems.
- Managed SAN and NAS environments, including storage provisioning, capacity planning, LUN configuration, and performance optimization.
- Performed storage maintenance activities such as firmware upgrades, disk replacements, health checks, and troubleshooting hardware and software issues.
- Implemented backup, replication, and disaster recovery solutions while collaborating with infrastructure teams to support business-critical applications.
- Utilized Linux environments for storage administration, system monitoring, and troubleshooting activities.

TECHNICAL SKILLS

Storage Technologies: NetApp ONTAP Administration, Snapshot, SnapMirror, SnapVault, Backup and Disaster Recovery, SAN/NAS Protocols, NFS, SMB/CIFS, FC, iSCSI, Storage Virtualization, Aggregate/Volume/LUN Provisioning, RAID Configuration, Object Storage Concepts, S3-Compatible Storage

Infrastructure & Systems: Linux/Unix, Windows Server, VMware vSphere, ESXi, vCenter, Capacity Planning, Storage Lifecycle Management, Firmware Upgrades, Storage Performance Troubleshooting, Enterprise Datacenter Operations

Cloud & Virtualization: AWS, Azure, Hybrid Cloud Storage, VMware Datastore Integration

Automation & DevOps: Bash, Shell Scripting, Python, Docker, Docker Compose, Kubernetes (GKE), Jenkins, CI/CD Pipelines, GitHub, JFrog, Infrastructure as Code (IaC)

Monitoring & Operations: ServiceNow, Incident Management, Root Cause Analysis, Performance Monitoring, Prometheus, Grafana, ELK Stack, Google Cloud Monitoring, Cloud Logging, Alerting

Methodologies: Scrum, ITIL Framework, DevOps Practices, Site Reliability Engineering (SRE), Continuous Monitoring, Change Management

Databases: MySQL, MSSQL, Oracle

CERTIFICATIONS

- NetApp Flash Storage Fundamentals
- NetApp Hybrid Cloud Associate – Accreditation Exam
- ONTAP Data Protection Administration Assessment
- NetApp Certified Technology Associate (Preparation)
- AWS Educate Introduction to Cloud
- AWS Educate Machine Learning Foundations

ACADEMIC PROJECTS

Loan Defaulter Prediction Using Machine Learning 2025

- Developed a machine learning-based loan default prediction system using financial and demographic datasets to identify high-risk borrowers and improve risk assessment accuracy.
- Implemented and compared multiple classification algorithms including Logistic Regression, Decision Tree, Random Forest, Support Vector Machine (SVM), K-Nearest Neighbors (KNN), Naive Bayes, Neural Networks, and XGBoost.
- Performed data preprocessing, exploratory data analysis (EDA), feature engineering, and model evaluation using accuracy, precision, recall, F1-score, and ROC-AUC metrics.
- Utilized Python, Scikit-learn, Keras, XGBoost, Jupyter Notebook, and Kaggle datasets for model development and evaluation.

Distributed Task Scheduling System with Load Balancing using gRPC 2025

- Designed and developed a distributed task scheduling system using gRPC to efficiently distribute workloads across multiple worker nodes.
- Implemented load balancing strategies including round-robin and least-connections to optimize task distribution, scalability, and system performance.
- Developed inter-service communication using Python and gRPC while utilizing Redis for task state management and Docker for containerized deployment.
- Evaluated system scalability, fault tolerance, and operational efficiency under varying distributed workloads.

EDUCATION

University of South Dakota
Master of Science in Computer Science | GPA: 3.80/4.0

Expected Graduation: May 2026
South Dakota, USA

Pydah College of Engineering and Technology
Bachelor of Technology in Civil Engineering | GPA: 7.01/10

2016 – 2019
India
